- DATV EME 1296 MHz best

Information given may change due to local circumstances
 Talkback via chat <https://dxspot.batc.org.uk/> or Zello VOIP channel "ATV Nederland".
 I always start at 144 MHz. Depending on the activity at 2m and the remaining time, I switch to 70cm somewhere at 1/2 of the qrv time. I have to change the antennas in the mast when switching from VHF to UHF.
 RB-DATV Preferred mode: DVB-S2 symbol rate 125k or 66k with FEC 1/2. Other settings are possible.
